About the course Setup vue router 4

Course Presenter : Tony Xhepa

Setup vue router 4, in this course Setup Vue Router 4 course is designed to teach you how to configure and use Vue Router 4 for navigation in modern Vue 3 applications. In this course, we will learn how to install Vue Router 4, integrate it into a Vue project, and define routes for different pages and components. You will explore working with nested routes, named routes, and dynamic route parameters to create flexible navigation structures. We will cover using query parameters, redirects, and aliases, as well as implementing navigation guards for authentication and route protection. Additionally, youâ€™ll learn about lazy loading routes for performance optimization, handling 404 pages, and customizing scroll behavior. By the end of the course, you will be able to set up and manage a fully functional routing system in Vue 3 using Vue Router 4, ensuring smooth and structured navigation in your applications. Tony Xhepa

Programming Category's Courses

Course Lesson(8)
