About the course Install Laravel media library

Course Presenter : Tony Xhepa

Install Laravel media library , in this course Install Laravel Media Library course is designed to teach you how to set up and configure Spatieâ€™s Laravel Media Library package to manage file uploads and media associations in Laravel applications. In this course, we will learn how to install the package via Composer, publish its configuration files, and run the required migrations to prepare the database. You will explore adding the HasMedia trait to models, defining media collections, and configuring file storage to handle images, documents, and other media. We will cover linking the storage directory, uploading files, and associating them with models, as well as retrieving and displaying media in views. Additionally, youâ€™ll learn how to test the installation, troubleshoot common setup issues, and follow best practices for securing and optimizing your media storage. By the end, you will have a fully functional media library ready for use in Laravel projects. Tony Xhepa

Programming Category's Courses

Course Lesson(9)

Lesson 1 : **01 Setup and Install Package Laravel Media Library Tutorial**

Lesson 2 : **02 Create Post Laravel Media Library Tutorial**

Lesson 3 : **03 Upload Image Laravel Media Library Tutorial**
