Mindluster Platform

About the course Create laravel filament blog

Course Presenter : Tony Xhepa

Create laravel filament blog, in this course you will learn how to build a fully functional blog from scratch using the powerful Laravel framework and the Filament admin panel. This course will guide you through setting up your Laravel project, installing and configuring Filament, and creating the necessary models, migrations, and controllers for posts, categories, tags, and users. You will master building CRUD operations quickly with Filament, integrating image uploads, managing media, and setting up relationships between posts and categories or tags. We will also cover creating a clean, user-friendly frontend to display blog posts, implementing search and filters, and managing roles and permissions for authors and admins. By the end, you will have a professional blog platform with an intuitive backend, ready to be customized and expanded for real-world use. Tony Xhepa
