About the course Create react app

Course Presenter : Tony Xhepa

Create react app, In the Create React App course, you will learn how to quickly set up and build modern React applications using the Create React App tool. This course will guide you through installing Node.js and npm, creating your first React project, and understanding the project structure generated by Create React App. You will learn how to run the development server, build production-ready files, and customize configuration for different project needs. We will cover the basics of React components, JSX, props, and state, as well as adding styles, images, and other assets. Youâ€™ll also explore how to use environment variables, install and manage dependencies, and work with React Router for navigation. By the end of this course, you will have a solid understanding of how to start and manage React projects efficiently, enabling you to focus on building interactive and scalable user interfaces.
