About the course Laravel with filament PHP

Course Presenter : Tony Xhepa

Laravel with filament PHP, in this course In the Laravel with Filament PHP course, you will learn how to integrate the Laravel framework with the powerful Filament admin panel to build modern, professional, and easy-to-manage web applications. This course will guide you through setting up a Laravel project, installing and configuring Filament, and creating fully functional CRUD operations without writing repetitive boilerplate code. You will explore how to build and customize resources, manage forms, tables, and filters, and handle advanced features like file uploads, relationships, and user roles with permissions. Additionally, youâ€™ll learn how to design intuitive dashboards, add custom widgets, and improve the admin panelâ€™s UI for better usability. By the end of this course, you will have the skills to create scalable, secure, and feature-rich admin panels, saving development time while maintaining high-quality standards for your Laravel projects. Tony Xhepa
