About the course Make laravel restaurant reservation app

Course Presenter : Tony Xhepa

Make laravel restaurant reservation app, in this course you will learn step-by-step how to build a complete restaurant booking system using the Laravel framework. This course will guide you through setting up the Laravel project, designing the database for tables, reservations, customers, and schedules, and creating CRUD operations for managing reservations. You will implement user authentication, role-based access for admins and staff, and features like available table search, booking confirmation, and reservation status updates. We will cover integrating date and time pickers, managing seating capacity, and sending email or SMS notifications for bookings. Additionally, you will learn how to create an intuitive admin panel to manage reservations, view reports, and handle cancellations. By the end of this course, you will have a fully functional, scalable, and secure restaurant reservation application ready for deployment in a real-world environment. Tony Xhepa
