About the course Laravel Queue

Course Presenter : Tony Xhepa

Laravel Queue, in this course provides a comprehensive guide to handling background jobs efficiently in Laravel applications. In this course, we will learn about the fundamentals of Laravel Queues, how they work, and why they are essential for improving application performance. We will explore different queue drivers such as database, Redis, and Amazon SQS, and understand how to configure them. You will learn how to create, dispatch, and process jobs, manage job retries, and handle failed jobs. The course also covers advanced features like job chaining, delayed jobs, and batch processing. Additionally, we will work with Laravel Horizon for monitoring and managing queues in real time. By the end of this course, you will be able to implement robust queue systems that enhance scalability, speed, and user experience in your Laravel projects. Tony Xhepa

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **How To Use Queues In Laravel Laravel Queue Tutorial**

Lesson 2 : **How To Use Queues with Mail Facade Laravel Queue Tutorial**
