About the course Install Laravel 9

Course Presenter : Tony Xhepa

Install Laravel 9, in this course is designed to guide you through the complete process of setting up Laravel 9 on your local development environment. In this course, we will learn about the system requirements for Laravel 9, installing PHP, Composer, and a database server, and configuring them for optimal performance. You will discover multiple installation methods, including using Laravel Installer, Composer Create-Project, and Laravel Sail for Docker-based setups. We will cover configuring environment variables, setting up virtual hosts or Laravel Valet, and testing the installation to ensure everything is running smoothly. This course also introduces you to basic Laravel project structure after installation, so you can start development confidently. By the end, you will be equipped to install Laravel 9 on different operating systems and prepare your environment for building robust web applications. Tony Xhepa
