About the course Create admin Panel laravel

Course Presenter : Tony Xhepa

Create admin Panel laravel, in this course teaches you how to build a functional and secure admin panel from scratch using the Laravel framework. In this course, we will learn about setting up a new Laravel project, configuring authentication, and designing an intuitive dashboard layout. You will explore how to create CRUD operations for managing users, products, or any application data, and implement features like search, filtering, and pagination. We will cover validation, file uploads, and image handling, along with role-based access control to secure different sections of the panel. The course also includes working with Blade templates, Tailwind CSS for styling, and using middleware for route protection. By the end, you will have the skills to develop a fully functional admin panel that can be customized and scaled for real-world Laravel applications. Tony Xhepa

Programming Category's Courses
