Mindluster Platform

About the course Create laravel classifiedwebsite

Course Presenter : Tony Xhepa

Create laravel classifiedwebsite, in this course teaches you how to build a complete classified ads platform from scratch using the Laravel framework. In this course, we will learn about setting up a new Laravel project, configuring authentication for users, and creating essential features such as ad categories, subcategories, and location-based listings. You will explore how to implement CRUD functionality for ads, handle image uploads with optimization, and add search and filtering options for easy browsing. We will cover user account management, role-based access for admin, sellers, and buyers, as well as building an admin panel to review, approve, or reject ads. The course also includes private messaging between users, email and in-app notifications, SEO optimization, and optional premium features like featured ads or payment integration. By the end, you will have the skills to develop a scalable, secure, and fully functional Laravel classified website ready for deployment. Tony Xhepa
