About the course Create a movie website with laravel Livewire

Course Presenter : Tony Xhepa

Create a movie website with laravel Livewire, in this course guides you through building a dynamic, interactive movie platform without heavy JavaScript. In this course, we will learn about setting up Laravel with Livewire, creating database structures for movies, genres, actors, and reviews, and designing responsive UI layouts with Tailwind CSS. You will explore building Livewire components for movie listings, detailed pages, search, and filtering with instant updates. We will integrate features like pagination, image uploads for posters, and fetching movie data from an external API such as TMDb. The course also covers implementing user authentication, role-based permissions, and a review and rating system. Youâ€™ll learn to create an admin dashboard for managing movies, categories, and user content, optimize performance with caching, and enhance SEO for better search visibility. By the end, youâ€™ll have a fully functional, scalable, and engaging movie website built with Laravel Livewire. Tony Xhepa
