About the course Laravel inertiaJS movie app

Course Presenter : Tony Xhepa

Laravel inertiaJS movie app, in this course you will learn how to build a fully functional movie management web application using Laravel as the backend framework and InertiaJS as the bridge to a modern frontend like Vue.js or React. The course starts with setting up the Laravel project, installing and configuring InertiaJS, and integrating frontend components seamlessly without creating a separate API. You will work on features like user authentication, CRUD operations for movies, image uploads, search and filter functionality, ratings, and reviews. Youâ€™ll also explore how to use Tailwind CSS for styling, manage routes with Inertia, and optimize performance. By the end, you will have a responsive, interactive SPA that feels fast and dynamic while being powered by Laravelâ€™s robust backend capabilities, preparing you to build similar full-stack projects.
