About the course Laravel livewire business listing

Course Presenter : Tony Xhepa

Laravel livewire business listing, in this course you will learn how to create a fully functional business directory application using Laravel as the backend framework and Livewire for building dynamic, interactive user interfaces without writing complex JavaScript. The course begins with setting up the Laravel project and installing Livewire, then moves on to building core features such as authentication, business CRUD operations, live search, filtering, and pagination. Youâ€™ll also learn how to handle image uploads for company logos, categorize listings with tags, and design an intuitive user and admin dashboard. The course covers styling with Tailwind CSS, implementing access control, and optimizing performance for a smooth user experience. By the end, youâ€™ll have a professional, responsive business listing platform ready for deployment and real-world use. Tony Xhepa
