About the course Employees management application with laravel

Course Presenter : Tony Xhepa

Employees management application with larave, in this course you will learn how to build a complete employee management system from scratch using Laravelâ€™s powerful features. The course begins with setting up the Laravel project, configuring the database, and creating migrations and models for employees, departments, attendance, leaves, and payroll. You will implement full CRUD operations to add, edit, view, and delete employee records, handle file uploads for profile pictures and documents, and set up authentication with role-based access control. Youâ€™ll also learn to build features like attendance tracking, leave requests with approval workflows, and payroll generation with salary calculations. The course covers search, filtering, pagination, and generating reports in PDF or Excel. By the end, you will have a professional, responsive employee management application ready for deployment, with clean code and a maintainable architecture. Tony Xhepa
