About the course Laravel livewire employees management

Course Presenter : Tony Xhepa

Laravel livewire employees management, in this course you will learn how to create a complete employee management system using Laravel for backend logic and Livewire for building dynamic, reactive interfaces without writing complex JavaScript. The course starts with setting up Laravel and Livewire, configuring the database, and creating models and migrations for employees, departments, attendance, leaves, and payroll. You will implement CRUD operations, file uploads for employee photos and documents, and live search with filtering and pagination. The course also covers attendance tracking, leave request workflows with approval, and payroll generation with salary calculations. Youâ€™ll learn to manage role-based access control for admins, HR, and employees, and build reporting features with PDF/Excel export. By the end, youâ€™ll have a fully functional, responsive, and professional employee management application ready for deployment. Tony Xhepa

Web Design Category's Courses

Course Lesson(19)
