About the course Laravel 8 admin panel

Course Presenter : Tony Xhepa

Laravel 8 admin panel, in this course you will learn how to build a fully functional and secure administration dashboard from scratch using Laravel 8. The course starts with setting up the Laravel project, configuring authentication, and designing the admin panel layout using Bootstrap or Tailwind CSS. You will create modules for managing users, roles, and permissions, integrating the Spatie Laravel Permission package to control access to different parts of the system. Youâ€™ll implement CRUD operations for various resources, protect routes with middleware, and add features like search, filtering, and pagination. The course also covers file uploads, data validation, and advanced UI components for better user experience. By the end, youâ€™ll have the skills to create scalable, role-based admin panels that can manage site content, users, and settings efficiently, with clean code and a maintainable structure ready for deployment. Tony Xhepa

Web Design Category's Courses

Course Lesson(8)
