About the course Install Laravel 8 on windows 10

Course Presenter : Tony Xhepa

Install Laravel 8 on windows 10, in this course you will learn step-by-step how to set up a complete Laravel 8 development environment on your Windows 10 machine. The course begins with installing PHP, Composer, and a local server environment such as XAMPP or Laragon. Youâ€™ll learn how to configure environment variables, verify PHP and Composer installations, and create a new Laravel 8 project. The course covers setting up a database with MySQL, configuring Laravelâ€™s .env file, and running migrations to prepare your application. You will also learn to start the Laravel development server, test routes, and ensure everything works properly. Additional tips include installing Node.js for asset compilation, using Laravel Mix, and troubleshooting common installation errors. By the end, youâ€™ll have a fully functional Laravel 8 setup ready for building and running applications on Windows 10. Tony Xhepa
