About the course Spatie laravel media library

Course Presenter : Tony Xhepa

Spatie laravel media library, in this course is designed to teach you how to efficiently manage file and media uploads in your Laravel applications using the powerful Spatie package. Youâ€™ll start by learning how to install and configure the Media Library, then explore uploading single and multiple files, organizing them into collections, and adding custom properties. The course covers advanced features such as image conversions, responsive images, watermarks, and optimization techniques to enhance performance. Youâ€™ll also integrate with storage solutions like AWS S3, DigitalOcean Spaces, or local storage, and learn how to connect it with Livewire, Vue.js, or Filament. Additionally, weâ€™ll cover polymorphic relationships, file validation, and API uploads, ensuring you can handle diverse media requirements. By the end, youâ€™ll master best practices, troubleshoot common errors, and be ready to implement scalable media management in any Laravel project. Tony Xhepa

Programming Category's Courses

Course Lesson(8)
