About the course Create a custom List in excel

Course Presenter : Pavan Lalwani

Create a custom List in excel, in this course teaches you how to design and use personalized lists to speed up data entry, enhance sorting, and streamline repetitive tasks. Youâ€™ll start by understanding Excelâ€™s default lists and how to create your own from scratch or by importing data from a cell range. The course covers setting up lists for autofill, applying them for custom sorting orders, and using them in data validation for controlled input. Youâ€™ll also learn to update and manage your lists efficiently, export them for use in other files, and integrate them into advanced features like Pivot Tables and Power Query. Practical examples include lists for employee names, product categories, project stages, and more. By the end, youâ€™ll have the skills to improve accuracy, save time, and customize Excel workflows, making your spreadsheets more efficient and tailored to your specific needs. Pavan Lalwani
