About the course Power BI

Course Presenter : Pavan Lalwani

Power BI, in this course is designed to teach you how to transform raw data into insightful, interactive dashboards and reports. Youâ€™ll start by learning the basics of Power BI, including connecting to various data sources, cleaning and transforming data using Power Query, and creating relationships between datasets. The course will guide you through building visuals, customizing charts, and applying filters to highlight key insights. Youâ€™ll also explore DAX (Data Analysis Expressions) to create calculated columns, measures, and advanced analytics. Best practices for designing clear and engaging dashboards, implementing row-level security, and optimizing report performance are covered in detail. Youâ€™ll gain experience in sharing reports, publishing to the Power BI Service, and collaborating in workspaces. By the end, youâ€™ll be able to build professional, data-driven solutions that enhance decision-making and bring clarity to complex datasets. Pavan Lalwani
