# About the course Power BI Fundamentals

### Course Presenter : Pavan Lalwani

Power BI Fundamentals, in this course is designed to give you a strong foundation in using Microsoft Power BI for data analysis and visualization. Youâ€™ll learn how to connect to various data sources, clean and transform data with Power Query, and create relationships between datasets. The course covers building interactive reports and dashboards, selecting the right visuals, and applying filters and slicers to enhance usability. Youâ€™ll explore the basics of DAX (Data Analysis Expressions) to create calculated columns and measures, helping you perform deeper analysis. Best practices for organizing your reports, maintaining consistency in design, and ensuring clarity in data storytelling are also included. By the end, youâ€™ll be able to turn raw data into meaningful insights, share your reports via the Power BI Service, and set the stage for more advanced skills in data modeling, analytics, and performance optimization. Pavan Lalwani
