About the course Principles of laboratory safety

Course Presenter : Ø§Ù„Ù…Ø¹Ù‡Ø¯ Ø§Ù„ÙˆØ·Ù†Ù‰ Ø§Ù„ØµØÙ‰

Principles of laboratory safety, This course provides a comprehensive foundation in laboratory safety, designed for students, researchers, and professionals working in scientific environments. It covers essential principles such as safe handling of chemicals, biological specimens, and equipment, along with correct use of protective clothing and safety devices. Learners will study risk assessment methods, proper waste disposal, emergency procedures, and accident prevention strategies. Emphasis is placed on understanding safety regulations, international standards, and fostering a culture of responsibility in the lab. Through practical examples and case studies, participants will develop the skills needed to identify hazards, minimize risks, and respond effectively to emergencies. By the end of the course, learners will be equipped to create a safe, efficient, and compliant laboratory environment that supports scientific progress without compromising human health or the environment.
