About the course CardioRespiratory care

Course Presenter : Ø§Ù„Ù…Ø¹Ù‡Ø¯ Ø§Ù„Ù†ÙŠ Ø§Ù„ØµØ

CardioRespiratory care, in this course provides a comprehensive understanding of the principles and practices of cardio-respiratory care, focusing on the prevention, diagnosis, and management of heart and lung conditions. Learners will explore the physiology of the cardiovascular and respiratory systems, common disorders such as asthma, COPD, heart failure, and arrhythmias, and the role of healthcare professionals in providing effective treatment. The course covers essential topics including oxygen therapy, mechanical ventilation, airway management, cardiac monitoring, and rehabilitation strategies. Special attention is given to patient assessment, emergency response, and the use of modern diagnostic and therapeutic technologies. Case studies and practical examples help participants apply theoretical knowledge in clinical settings. By the end of the course, learners will gain the skills needed to support patients with cardio-respiratory diseases, promote recovery, and contribute to improved quality of life and patient safety.
