About the course Medical surgical nursing

Course Presenter : Ø§Ù„Ù…Ø¹Ù‡Ø¯ Ø§Ù„Ù†ÙˆÙ†ÙŠ Ø§Ù„Ø¹ÙŠÙŠ

Medical surgical nursing, This course provides an in-depth understanding of the principles and practices of medical-surgical nursing, preparing learners to care for adult patients with diverse medical and surgical conditions. The course covers patient assessment, clinical decision-making, and evidence-based interventions across body systems, including cardiovascular, respiratory, gastrointestinal, neurological, and musculoskeletal systems. Emphasis is placed on preoperative and postoperative care, pain management, wound healing, infection prevention, and fluid and electrolyte balance. Students will also explore the role of the nurse in health promotion, patient education, and collaboration within multidisciplinary teams. Special focus is given to the management of chronic illnesses, acute emergencies, and the use of modern technologies in patient care. Case studies, simulations, and practical training allow learners to integrate theory with clinical skills. By the end of the course, participants will be prepared to provide safe, holistic, and patient-centered care in both hospital and community settings. Ø§Ù„Ù…Ø¹Ù‡Ø¯ Ø§Ù„Ù†ÙˆÙ†ÙŠ Ø§Ù„Ø¹ÙŠÙŠ
