About the course Human digestive working model making

Course Presenter : howtofunda

Human digestive working model making, in this course helps students understand the process of digestion through a creative, hands-on science project. In this course, learners will study the structure and functions of the digestive system, including the mouth, esophagus, stomach, intestines, liver, and pancreas. Step-by-step guidance is given to design and build a working model using simple materials such as plastic bottles, tubes, balloons, and clay to represent different organs. The model demonstrates how food travels through the digestive tract, how it is broken down into nutrients, and how waste is expelled from the body. Alongside practical construction, the course explains key concepts like mechanical and chemical digestion, enzyme action, and nutrient absorption in the small intestine. Students will also learn the importance of a healthy diet for maintaining digestive health. By the end of the course, learners will have both a clear theoretical understanding and a functional model that makes the complex process of digestion easy to visualize, ideal for classrooms, science fairs, or home experiments. howtofunda

Science Category's Courses

Course Lesson(10)

Lesson 1 :
vacuum cleaner working model science exhibition diy simple using waste materials howtofunda

Lesson 2 :
human digestive working model making using waste materials at home easily DIY howtofunda

Lesson 3 :
respiratory system working model 3d LUNGS making using waste materials DIY howtofunda

Lesson 4 :
Drip irrigation working model without motor science project DIY howtofunda waste materials

Lesson 5 :
seismograph working model making using waste materials earthquake measurement DIY howtofunda

Lesson 6 :
drip irrigation working model making using waste materials science projects DIY howtofunda

Lesson 7 : **bio gas plant working model making science project howtofunda source of energy**

Lesson 8 :
drip irrigation system working model using cardboard waste materials DIY HowtoFunda class 9

Lesson 9 :
how to make village hut model making using cardboard and waste materials DIY crafts howtofunda

Lesson 10 : **drip irrigation system working model science project diy best out of waste howtofunda**
