About the course Solar system working model 3d

Course Presenter : howtofunda

Solar system working model 3d, in this course is designed to give students a hands-on experience in understanding our planetary system through a creative and interactive project. In this course, learners will explore the arrangement, movement, and unique characteristics of planets, the sun, and other celestial bodies by constructing a three-dimensional working model. Step by step, students will learn how to design and assemble each planet in proportionate sizes, arrange them according to their orbits, and demonstrate rotation and revolution with simple mechanisms such as motors or manual gears. This approach helps simplify complex astronomical concepts, making them engaging and easy to grasp. The course not only enhances knowledge in astronomy but also develops practical skills in model-making, creativity, and scientific demonstration. It is particularly suitable for school science projects, exhibitions, and classroom learning, where students can visualize the dynamic motion of the solar system. By the end of the course, participants will have a functional and visually appealing model that effectively represents the wonders of space in an educational and artistic way. howtofunda

Science Category's Courses

Course Lesson(15)

Lesson 1 : **solar system working model with lights rotating science project for exhibition craftpiller**

Lesson 2 :
solar system working model 3d simple inspire innovative science exhibition diy howtofunda

Lesson 3 :
solar system working model 3d for social science project DIY at home howtofunda inspire award

Lesson 4 :
solar system working model 3d new innovative inspire science project howtofunda craftpiller

Lesson 5 :
solar system working model inspire award social science fair project howtofunda DIY at home

Lesson 6 : **solar system working model for science exhibition project diy at home craftpiller**

Lesson 7 : **solar system working model for science exhibition with lights and stars diy craftpiller**

Lesson 8 : **solar system working model science project for exhibition simple cardboard craftpiller**

Lesson 9 :
solar system working model making for science project diy at home simple and easy craftpiller

Lesson 10 : **solar system working model new design innovative science project diy craftpiller**

Lesson 11 : **solar system model for science fair exhibition diy at home easily roof hanging craftpiller**

Lesson 12 : **how to make solar system working model making using cardboard diy craftpiller**

Lesson 13 : **solar system working model latest designs science project simple and easy craftpiller**

Lesson 14 :
solar eclipse lunar eclipse earth rotation working model 3d science project diy craftpiller

Lesson 15 : **how to make the solar system planets in easy and simple manner diy craftpiller**
