About the course Pluto planet model making for solar system

Course Presenter : howtofunda

Pluto planet model making for solar system, in this course is a creative and educational project that helps students explore Pluto, the dwarf planet, and its place in our solar system. In this course, learners will design and build a 3D model of Pluto using simple materials like thermocol balls, clay, cardboard, paints, and charts. Step by step, the course explains Plutoâ€™s unique features such as its small size, icy surface, long elliptical orbit, and its reclassification from a planet to a dwarf planet. Students will also learn about its moons, especially Charon, and its importance in astronomy. The project allows learners to compare Pluto with other planets, showing why it differs in structure and orbit. This hands-on activity not only makes astronomy engaging but also builds creativity, problem-solving skills, and presentation abilities. Perfect for school science projects, classroom displays, or solar system exhibitions, the course connects theory with practical learning. By the end, participants will have a detailed Pluto model that highlights its characteristics and role in the solar system, making space science more fun and understandable. howtofunda

Science Category's Courses

Course Lesson(7)

Lesson 1 :
how to make solar system planets using thermocol balls science project howtofunda craftpiller

Lesson 2 : **Pluto planet model making for solar system science project diy howtofunda**

Lesson 3 :
Venus planet making using thermocol ball and painting for solar system science project howtofunda

Lesson 4 :
mars planet making for science project in simple and easy manner solar system model howtofunda

Lesson 5 : **saturn model making using thermocol balls diy solar planets howtofunda**

Lesson 6 :
Uranus planet making for solar system project models for science project exhibition howtofunda

Lesson 7 : **How to make Earth Globe Very Easy at Home 3d Earth Globe Model diy howtofunda**
