About the course Growing beans

Course Presenter : Epic Gardening

Growing beans, in this course is a practical course designed to teach learners how to cultivate different types of beans successfully, from planting to harvesting. The course begins with choosing the right bean varieties for your climate and soil type, then guides you through seed preparation, spacing, and germination techniques. Youâ€™ll learn how to support climbing varieties with stakes or trellises, manage watering schedules, and enrich the soil naturally using compost and organic fertilizers. The lessons also cover identifying and controlling common pests and diseases, such as aphids and root rot, using eco-friendly methods. Step-by-step demonstrations show how to recognize signs of maturity and harvest beans at the right time for maximum flavor and nutrition. By the end of the course, learners will have the confidence to grow healthy, high-yield bean plants in home gardens or small farms with professional results. Epic Gardening

Agriculture Category's Courses
