About the course Power BI and dax

Course Presenter : WiseOwlTutorials

Power BI and dax, in this course provides a complete understanding of how to transform raw data into interactive visual insights. Youâ€™ll learn how to connect, clean, and model data using Power BI, and create stunning dashboards for better decision-making. The course also introduces DAX (Data Analysis Expressions) â€” the powerful formula language that enables custom calculations, time intelligence, and performance metrics. Through hands-on examples, youâ€™ll discover how to use DAX to create measures, calculated columns, and dynamic reports. By the end, youâ€™ll be able to design data models, automate analysis, and present key business insights clearly and efficiently using Power BI and DAX together. WiseOwlTutorials
