About the course Loops and formatting in python

Course Presenter : WiseOwlTutorials

Loops and formatting in python, in this course introduces two key programming concepts that make your code efficient and professional. Youâ€™ll learn how to use loops such as for and while to repeat actions, iterate through lists, and automate repetitive tasks. The course also covers loop control statements like break, continue, and pass to manage program flow. In the formatting section, youâ€™ll explore how to display clean, readable output using f-strings, the format() method, and advanced number and text formatting techniques. Through practical exercises, youâ€™ll build the skills to write well-structured, efficient programs with clear and visually appealing results. WiseOwlTutorials
