About the course DAX for Power BI

Course Presenter : WiseOwlTutorials

DAX for Power BI, in this course teaches you how to use Data Analysis Expressions (DAX) to create powerful calculations and dynamic data models in Power BI. Youâ€™ll learn how to write DAX formulas for measures, calculated columns, and advanced filters to perform deep analytical tasks. The course covers essential functions like SUM, CALCULATE, FILTER, and time intelligence formulas for comparing data over periods. Youâ€™ll also explore practical business scenarios where DAX enhances reporting accuracy and performance. By the end of the course, youâ€™ll be able to design smart, data-driven dashboards and unlock the full analytical potential of Power BI through the mastery of DAX expressions. WiseOwlTutorials
