Mindluster Platform

About the course Financial modeling

Course Presenter : Simon Sez IT

Financial modeling, in this course teaches you how to build dynamic financial models from scratch to evaluate business performance and make data-driven decisions. Youâ€™ll learn how to analyze financial statements, forecast revenues and expenses, and link income statements, balance sheets, and cash flow projections in Excel. The course covers valuation techniques, scenario and sensitivity analysis, and best practices for structuring models clearly and accurately. Through real-world case studies, youâ€™ll gain hands-on experience designing professional models used in corporate finance, investment analysis, and budgeting. By the end, youâ€™ll be able to create reliable models that support strategic and financial decision-making. Simon Sez IT
