About the course Install excel 365 on windows 11

Course Presenter : Simon Sez IT

Install excel 365 on windows 11, in this course guides you step by step through downloading, installing, and activating Microsoft Excel 365 on your computer. Youâ€™ll learn how to access your Microsoft 365 account, choose the correct subscription plan, and set up Excel for the first time on Windows 11. The course covers system requirements, installation troubleshooting, and updates management to ensure smooth performance. Youâ€™ll also explore how to sign in, connect your OneDrive for cloud storage, and customize settings like themes, language, and add-ins. By the end, youâ€™ll have a fully functional version of Excel 365 ready for use, with the knowledge to manage licenses and keep your application secure and up to date for professional and personal tasks.
