About the course Flutter firebase

Course Presenter : ProgrammingKnowledge

Flutter firebase, in this course teaches you how to build powerful, real-time mobile applications by integrating Googleâ€™s Flutter framework with Firebase backend services. Youâ€™ll learn how to connect your Flutter app to Firebase, set up authentication using email, Google, or phone login, and manage user sessions securely. The course covers Firestore database for storing and syncing data, Firebase Storage for managing images and files, and Cloud Messaging for push notifications. Youâ€™ll also explore Firebase Analytics, Crashlytics, and Remote Config to monitor and improve your appâ€™s performance. Through hands-on projects, youâ€™ll build fully functional apps that demonstrate real-world Firebase integration. By the end, youâ€™ll have the skills to develop scalable, responsive, and cloud-connected apps using Flutter and Firebase efficiently. ProgrammingKnowledge
