About the course Data science with kaggle

Course Presenter : ProgrammingKnowledge

Data science with kaggle, in this course introduces you to the practical world of data analysis and machine learning using the Kaggle platform. Youâ€™ll learn how to use Kaggle Notebooks to write and execute Python code in the cloud without installation. The course covers essential libraries like Pandas, NumPy, Matplotlib, and Seaborn for data manipulation and visualization. Youâ€™ll explore techniques for cleaning datasets, handling missing values, and building predictive models using Scikit-learn. Through guided projects and real-world competitions, youâ€™ll gain hands-on experience solving data challenges and analyzing public datasets. The course also teaches you how to share your work, collaborate with others, and build a Kaggle profile that showcases your data science skills to employers and the global data community. Computer Science Category's Courses

Course Lesson(4)

Lesson 1 : **Master Data Science with Kaggle Courses Learn Machine Learning AI for Free**

Lesson 2 :
How to Find and Use Kaggle Datasets in Your Project Kaggle Datasets for Data Science ML

Lesson 3 : **How to Compete in Kaggle A Complete Beginner s Guide 2025**

Lesson 4 : **How to Get Started with Kaggle Beginner s Guide to Kaggle 2025**
