About the course Install python flask on windows 11

Course Presenter : ProgrammingKnowledge

Install python flask on windows 11, in this course guides you step by step through setting up Flask, one of the most popular web frameworks for Python. Youâ€™ll start by installing Python and configuring environment variables, then learn how to create and activate a virtual environment to manage project dependencies. The course covers installing Flask using pip, verifying the setup, and running your first â€œHello, World!â€ web application locally. Youâ€™ll also explore basic project structure, handling routes, and testing the development server on Windows 11. In addition, the course explains how to use Visual Studio Code for editing and debugging Flask apps efficiently. By the end, youâ€™ll have a fully working Flask setup on Windows 11, ready to build and run dynamic web applications with Python. ProgrammingKnowledge

Computer Science Category's Courses

Course Lesson(10)

Lesson 1 : **How to Use Flask SQLAlchemy to Interact with Databases in a Flask App 2025**

Lesson 2 :
How to Publish Your Flask App on PythonAnywhere Deploy Flask App to PythonAnywhere 2025

Lesson 3 : **How to Upload a File on a Flask Server 2025**

Lesson 4 : **How to Use GPS for Location Tracking in Python Visualize GPS Data with Folium 2025**

Lesson 5 : **How to Send Emails with Flask Using Python Flask Mail Tutorial 2025**

Lesson 6 :
How to Create a Flask RESTful API with GET and POST Requests Flask REST API Tutorial 2025

Lesson 7 : **How to Set Up Flask with MySQL in Visual Studio Code VS Code Step by Step Guide 2025**

Lesson 8 :
How To Connect to MySQL in Visual Studio Code VSCode on Windows 11 and Run SQL Queries 2025

Lesson 9 :
How to Setup a Flask Application in Visual Studio Code and Run a Basic App Flask in VSCode 2025

Lesson 10 : **How to Install Python Flask on Windows 11 Complete Guide 2025**
