Mindluster Platform

About the course Creating google cloud Platform

Course Presenter : ProgrammingKnowledge

Creating google cloud Platform, in this course guides you through setting up and managing your Google Cloud account from scratch. Youâ€™ll learn how to create a new GCP account, activate the free trial, and navigate the Google Cloud Console. The course explains how to create and organize projects, enable APIs, and manage billing and permissions securely. Youâ€™ll explore core services like Compute Engine, Cloud Storage, App Engine, and BigQuery, understanding how they work together to power modern cloud applications. Through step-by-step tutorials, youâ€™ll learn to use Cloud Shell and the SDK to deploy and manage resources. By the end of the course, youâ€™ll be confident in creating, configuring, and maintaining a scalable Google Cloud environment for development, data, or production workloads. ProgrammingKnowledge

Computer Science Category's Courses

Course Lesson(9)

Lesson 1 :
How to Deploy a Python Django App with Google Cloud Platform GCP on a Virtual Machine 2025

Lesson 2 : **How to Host a Simple Website on Google Cloud Storage GCP**

Lesson 3 :
How to Use Google Maps API in Python Geocoding Reverse Geocoding and Calculating Distance 2025

Lesson 4 :
How to Use Google Cloud Vision API to Analyze Images Vision AI API Tutorial with Python 2025

Lesson 5 : **How to Use Google s Speech to Text API with Python 2025**

Lesson 6 : **How to Use the Gemini API with Python How to Integrate Gemini API with Python 2025**

Lesson 7 : **How to Use Google Translate API via GCP with Python Code Google Cloud Platform 2025**

Lesson 8 : **How to Create a GCP Google Cloud Platform FREE Account 2025**

Lesson 9 : **How to Create a Virtual Machine VM on Google Cloud Platform GCP 2025**
