About the course Create react native firebase CRUD app

Course Presenter : ProgrammingKnowledge

Create react native firebase CRUD app, in this course teaches you how to build a complete mobile application that performs Create, Read, Update, and Delete operations using Firebase as the backend. Youâ€™ll start by setting up a React Native project, connecting it to Firebase, and configuring authentication and Firestore database. The course walks you through building interactive UI components, handling real-time data updates, and implementing form validation. Youâ€™ll learn how to use Firebase services to store data securely, sync information instantly, and manage users effectively. Step-by-step examples show how to add, edit, and delete data dynamically within your app. By the end, youâ€™ll have a fully functional mobile CRUD app and a strong understanding of integrating Firebase with React Native. This course is ideal for beginners and intermediate developers looking to build real-world mobile applications. ProgrammingKnowledge

Programming Category's Courses

Course Lesson(8)

Lesson 1 : **Create React Native Firebase CRUD App with Firestore 1**

Lesson 2 : **Create React Native Firebase CRUD App with Firestore 2**

Lesson 3 : **Create React Native Firebase CRUD App with Firestore 3**

Lesson 4 : **Create React Native Firebase CRUD App with Firestore 4**

Lesson 5 : **Create React Native Firebase CRUD App with Firestore 5**

Lesson 6 : **Create React Native Firebase CRUD App with Firestore 6**

Lesson 7 : **Create React Native Firebase CRUD App with Firestore 7**

Lesson 8 : **Create React Native Firebase CRUD App with Firestore 8**
