About the course Spring boot firebase CRUD application

Course Presenter : ProgrammingKnowledge

Spring boot firebase CRUD application, in this course teaches you how to build a complete backend application using Spring Boot and Firebase for real-time data management. Youâ€™ll learn how to set up a Spring Boot project, connect it with Firebase, and implement CRUD operations â€” Create, Read, Update, and Delete â€” using Firebase Firestore or Realtime Database. The course explains how to configure Firebase credentials, build RESTful APIs, and integrate authentication to secure data access. Youâ€™ll also explore JSON handling, error management, and data synchronization between the server and Firebase. Through hands-on projects, youâ€™ll practice building endpoints that interact seamlessly with the cloud database. By the end, youâ€™ll have the skills to develop scalable, cloud-connected Java applications using Spring Boot and Firebase â€” perfect for web and mobile backends. ProgrammingKnowledge

Web Design Category's Courses

Course Lesson(7)

Lesson 1 :
Spring Boot Firebase CRUD Application 1 Introduction and Setting Up Firebase with Spring boot

Lesson 2 : **Spring Boot Firebase CRUD Application 2 Spring boot and Firebase Authorization**

Lesson 3 : **Spring Boot Firebase CRUD Application 3 Implementing Springboot REST Endpoints**

Lesson 4 : **Spring Boot Firebase CRUD Application 4 Implementing Firebase Services in Springboot**

Lesson 5 : **Spring Boot Firebase CRUD Application 5 End to End testing Firebase CRUD API**

Lesson 6 : **How to use Firebase with Spring boot REST Application**

Lesson 7 : **Spring Boot CRUD Application How to create CRUD API using Spring Boot**
