About the course Handbrake

Course Presenter : TutorTube

Handbrake, This comprehensive course guides you through using HandBrake, a powerful open-source video transcoder designed to convert, compress, and optimize video files efficiently. You will learn how to navigate the interface, choose the right presets, and convert videos into formats like MP4 and MKV. The course covers adjusting resolution, bitrate, and codecs to balance quality and file size, as well as adding subtitles, managing audio tracks, and cropping or trimming footage. You will also explore advanced features such as batch processing, filters, and preparing videos for YouTube, mobile devices, and social media platforms. By the end of the course, youâ€™ll master essential HandBrake workflows and confidently create high-quality, lightweight video files suitable for any purpose. TutorTube
