About the course Accessing structured web

Course Presenter : TutorTube

Accessing structured web, This course introduces learners to the concept of accessing the structured web, where information is organized using formats such as Schema.org, JSON-LD, Microdata, and RDFa. You will learn how structured data helps search engines, AI tools, and automated systems understand web content with greater accuracy. The course explains how to identify structured data on websites, extract it efficiently, and use it for research, content analysis, and building intelligent applications. You will also explore practical tools and methods for parsing structured web data, understanding entity relationships, and improving data-driven decision-making. By the end of the course, you will be able to confidently access and utilize structured web information to enhance SEO, automation, and AI-powered workflows. TutorTube
