About the course Corel draw basics

Course Presenter : TutorTube

Corel draw basics, This course introduces beginners to the essential tools and features of CorelDRAW, a powerful vector graphic design software used for logos, illustrations, layouts, and branding. You will learn how to navigate the interface, create new documents, and work with shapes, lines, and text. The course covers key tools such as the Pick, Shape, Pen, and Curve tools, along with color fills, outlines, and gradients. You will also explore layers, arranging objects, importing images, using guidelines, and applying effects. Practical exercises guide you through designing simple logos, posters, and vector artwork. By the end of the course, you will understand the CorelDRAW workflow and be able to create clean, professional designs with confidence. TutorTube
