Course Presenter : TutorTube

Photopea, This course introduces learners to Photopea, a powerful online photo editor that works like Adobe Photoshop but runs directly in the browser. You will learn how to navigate the interface, create new projects, and work with essential tools such as Move, Brush, Eraser, Lasso, and Pen. The course covers layers, masks, blending modes, and adjustment layers for editing color, brightness, contrast, and more. You'll also explore text tools, filters, transformations, and techniques for retouching photos or designing graphics. Practical lessons include editing images, creating thumbnails, removing backgrounds, and exporting files in formats like PNG, JPG, PSD, and SVG. By the end, you will confidently use Photopea to perform professional-level editing without installing any software. TutorTube
