About the course Hygraph with next js

Course Presenter : Net Ninja

Hygraph with next.js, Hygraph with Next.js is a practical course that teaches how to build modern, content-driven web applications using Hygraph as a headless CMS and Next.js as the frontend framework. The course explains how to design content models in Hygraph, manage structured data, and fetch content using GraphQL APIs. Learners will explore integrating Hygraph with Next.js to render content using Static Site Generation (SSG), Server-Side Rendering (SSR), and Incremental Static Regeneration (ISR) for optimal performance and SEO. The course also covers handling images, localization, and content updates in real time. Through hands-on examples, learners will build scalable and flexible websites such as blogs, course platforms, or business sites. By the end of the course, participants will understand how to manage content efficiently with Hygraph and deliver fast, SEO-friendly Next.js applications suitable for production environments.
