About the course GitHub spec Kit

Course Presenter : Net Ninja

GitHub spec Kit course, provides a comprehensive introduction to designing, documenting, and managing software specifications using a spec-first approach. In this course, you will learn how to create clear and structured specifications using tools such as Markdown, OpenAPI, and JSON Schema, and how to manage them directly within GitHub. The course explains how specifications act as formal contracts between teams, helping frontend, backend, and mobile developers collaborate efficiently and reduce miscommunication. You will explore best practices for versioning specifications, reviewing changes through pull requests, and validating specs using automated checks. In addition, the course demonstrates how to integrate specifications into CI/CD pipelines to ensure consistency between documentation and implementation. By the end of the course, you will be able to use GitHub Spec Kit to build scalable, well-documented, and maintainable APIs and systems suitable for modern SaaS, microservices, and enterprise projects. Programming Category's Courses

Course Lesson(9)

Lesson 1 : **Up Running with GitHub Spec Kit 1 Intro Setup**

Lesson 2 : **Up Running with GitHub Spec Kit 2 The constitution Command**

Lesson 3 : **Up Running with GitHub Spec Kit 3 The specify Command**

Lesson 4 : **Up Running with GitHub Spec Kit 4 The clarify Command**

Lesson 5 : **Up Running with GitHub Spec Kit 5 The plan Command**

Lesson 6 : **Up Running with GitHub Spec Kit 6 The tasks Command**

Lesson 7 : **Up Running with GitHub Spec Kit 7 The analyze Command**

Lesson 8 : **Up Running with GitHub Spec Kit 8 Implementing Tasks**

Lesson 9 : **Up Running with GitHub Spec Kit 9 Adding More Features**
