About the course Selenium Java coding tips

Course Presenter : SDET QA

Enhance your programming skills with our comprehensive Selenium Java Coding Tips online course, designed to elevate your automation testing expertise. This training course provides practical insights and best practices to optimize your Selenium automation scripts, making you more efficient and effective in your testing projects. Whether you're a beginner or an experienced professional, mastering these tips will improve your coding proficiency and contribute significantly to your career growth in the field of software testing. In this course, you will learn to: - Write clean, efficient, and maintainable Selenium Java scripts - Implement advanced debugging and troubleshooting techniques - Utilize Java features to enhance automation test frameworks - Develop reusable code components for scalable testing solutions - Optimize test execution speed and reliability - Integrate Selenium with other testing tools and frameworks This training course is ideal for software testers, QA engineers, automation specialists, and developers seeking to refine their programming skills in Selenium and Java. It is especially valuable for professionals in the Middle East, including Saudi Arabia and the UAE, who want to stay competitive in the rapidly evolving tech industry. Choosing this course on our platform ensures access to expert instruction, real-world examples, and a flexible learning schedule. The course is designed to boost your professional skills, helping you deliver high-quality testing solutions and advance your career in software quality assurance. Upon completion, you will receive a certified course certificate, validating your expertise in Selenium Java coding tips. This certification can enhance your resume and open new career opportunities in automation testing, quality assurance, and software development roles. Invest in your professional development today with this certified training course, and take a significant step toward becoming a proficient automation testing professional in the Middle East or beyond. SDET QA

Programming Category's Courses

Course Lesson(13)

Lesson 1 : **Selenium Java Coding Tips Tricks 13 Selenium WebDriver Common Exceptions**

Lesson 2 :
Selenium Java Coding Tips Tricks 12 Thread Safety to avoid unstability in Parallel Execution

Lesson 3 : **Selenium Java Coding Tips Tricks 11 Parallel execution with DataProvider in TestNG**

Lesson 4 : **Selenium Java Coding Tips Tricks 10 How to handle AJAX calls Explicit Wait**

Lesson 5 :
Selenium Java Coding Tips Tricks 9 How to Find Mandatory Fields on the Page Pseudo elements

Lesson 6 :
Selenium Java Coding Tips Tricks 8 How to Find Web Element on Scrolling Page Infinitely

Lesson 7 : **Selenium Java Coding Tips Tricks 7 How to Count Elements on Scrolling Page Infinitely**

Lesson 8 : **Selenium Java Coding Tips Tricks 6 How to Upload a File without using sendKeys method**

Lesson 9 : **Selenium Java Coding Tips Tricks 5 How to Identify Duplicate Items in a List Box**

Lesson 10 : **Selenium Java Coding Tips Tricks 4 How to Check if a List Box is Sorted**

Lesson 11 :
Selenium Java Coding Tips Tricks 3 Handle a Dynamic Table with Changing Rows and Columns

Lesson 12 : **Selenium Java Coding Tips Tricks 2 Handle iFrames without using switchTo frame**

Lesson 13 : **Selenium Java Coding Tips Tricks 1 Handle Alerts without using switchTo alert**
