About the course API Testing using Postman Step by Step

Course Presenter : SDET QA

Enhance your professional skills and accelerate your career growth with our comprehensive online course on API Testing using Postman. Designed for learners in the Middle East and beyond, this training course provides practical, step-by-step guidance on mastering API testingâ€”an essential skill in todayâ€™s digital world. Whether you're a beginner or an experienced developer, this certified course equips you with the knowledge needed to ensure the quality and reliability of web services. Throughout this course, you will learn how to effectively use Postman for API testing, including creating test cases, automating workflows, and validating API responses. The curriculum covers fundamental concepts in computer science related to API development and testing, ensuring a solid foundation for real-world applications. By the end of this training course, you will be able to confidently perform comprehensive API tests, troubleshoot issues, and enhance software quality. This course is ideal for software developers, QA testers, automation engineers, and IT professionals seeking to expand their expertise in API testing. It is also beneficial for students and professionals in the Middle East who want to boost their employability with a recognized certification in API testing. Choosing this platform ensures you receive high-quality, industry-relevant training delivered by experienced instructors. Our platformâ€™s interactive learning environment and certification provide credibility to your professional profile, making you stand out in competitive job markets across Saudi Arabia, UAE, and the broader Middle East. Upon completion, you will receive a recognized certificate that validates your skills in API testing using Postman. This certification can open doors to new career opportunities, including roles in software development, quality assurance, and technical testing. Invest in this professional training course to elevate your computer science knowledge and advance your career in the fast-growing tech industry. SDET QA

Computer Science Category's Courses

Course Lesson(10)

Lesson 1 : **Session1 Introduction to API Testing**

Lesson 2 : **Session 2 API Testing Postman Environment Setup Types of HTTP Requests**

Lesson 3 :
Session 3 API Testing Postman How To Create Own API s JSON Java Script Object Notation

Lesson 4 : **Session 4 API Testing Postman API Response Validations Different types of Assertions**

Lesson 5 : **Session 5 API Testing Postman Scripts Types of Variables**

Lesson 6 : **Session 6 API Testing Postman API Chaining**

Lesson 7 : **Session 7 API Testing Postman Parameterisation Data Driven Testing**

Lesson 8 : **Session 8 API Testing Postman File Upload API Authentication Types**

Lesson 9 :
Session 9 API Testing Postman Swagger Documenting Publishing API s e Commerce App API s

Lesson 10 :
Session 10 API Testing Postman e Commerce API s How to Run Collections Git Github Jenkins
