About the course API testing using restassured step by step

Course Presenter : SDET QA

Enhance your expertise in API testing with our comprehensive online training course, "API Testing Using RestAssured Step by Step." Designed for professionals seeking to deepen their understanding of computer science and software testing, this course offers practical skills that are highly valued in the tech industry. Whether you're an aspiring developer, QA engineer, or software tester in the Middle East or beyond, this certified course provides the knowledge needed to excel in modern software development environments. Throughout this training course, you will learn to effectively implement API testing using RestAssured, a popular Java library for testing REST APIs. This step-by-step approach ensures you grasp core concepts and practical techniques vital for ensuring API reliability and performance. What you will learn: - Fundamentals of API testing and RestAssured framework - How to set up and configure RestAssured for different testing scenarios - Writing and executing automated API tests efficiently - Validating responses, status codes, and data integrity - Handling authentication, headers, and parameters in API requests - Integrating API tests into CI/CD pipelines for continuous testing - Best practices for debugging and maintaining test scripts This course is ideal for software developers, testers, and QA professionals in Saudi Arabia, the UAE, and the broader Middle East region who want to advance their professional skills and certification portfolio. It is also suitable for individuals aiming to start a career in software testing or expand their existing knowledge of automation tools. Choosing this course on our platform means gaining access to expert-led instruction, practical exercises, and a certified qualification that boosts your career growth. Our training course is designed to equip you with the skills necessary to meet industry demands and stand out in a competitive job market. Upon completion, you will receive a recognized certificate, validating your proficiency in API testing using RestAssured. This certification can open doors to new job opportunities and career advancement in the dynamic field of computer science and software testing. Take the next step toward becoming a certified API testing professional and elevate your career today. SDET QA

Computer Science Category's Courses

Course Lesson(12)

Lesson 1 : **Session 1 API Testing RestAssured Introduction Environment Setup HTTP Methods**

Lesson 2 : **Session 2 API Testing RestAssured Creating Post Request Payloads in Multiple Ways**

Lesson 3 : **Session 3 API Testing RestAssured Cookies Headers Query Path Parameters Logging**

Lesson 4 : **Session 4 API Testing RestAssured Parsing Response Body JSONObject**

Lesson 5 :
Session 5 API Testing RestAssured Parsing XML Response Body File Upload Download API s

Lesson 6 : **Session 6 API Testing RestAssured JSON XML Schema validations Serial De serilisation**

Lesson 7 : **Session 7 API Testing RestAssured Types of Authorizations Faker Library**

Lesson 8 : **Session 8 API Testing RestAssured API Chaining**

Lesson 9 : **Part 1 Building API Automation Testing Framework in Rest Assured from from Scratch**

Lesson 10 : **Part 2 Building API Automation Testing Framework in Rest Assured from from Scratch**

Lesson 11 : **Part 3 Building API Automation Testing Framework in Rest Assured from from Scratch**

Lesson 12 : **Part 4 Building API Automation Testing Framework in Rest Assured from Scratch**
