About the course Jenkins CI CD with git and gitHub

Course Presenter : SDET QA

Enhance your expertise in modern software development with our comprehensive online course, Jenkins CI/CD with Git and GitHub. This training course is designed to empower aspiring developers, DevOps engineers, and IT professionals in the Middle East, especially in Saudi Arabia and the UAE, by providing practical skills in continuous integration and continuous deployment. Mastering Jenkins, Git, and GitHub will significantly boost your professional profile, opening doors to new career opportunities and accelerating your career growth in the competitive field of Computer Science. What you will learn: - Fundamentals of Jenkins and its role in CI/CD pipelines - How to integrate Jenkins with Git and GitHub for seamless version control - Automating build, test, and deployment processes - Managing complex workflows and pipelines efficiently - Best practices for maintaining reliable and scalable software delivery - Troubleshooting common issues in CI/CD environments - Implementing security and access control in pipelines Who this course is for: This training course is ideal for software developers, system administrators, DevOps practitioners, and IT professionals seeking to enhance their professional skills. Whether you are starting your career or aiming to specialize in automation and continuous delivery, this course provides the essential knowledge to succeed in today's tech-driven landscape. Why choose this course on our platform: Our platform offers high-quality, professionally curated training courses tailored for learners in the Middle East. With expert instructors, real-world examples, and interactive assessments, you will gain practical skills that are directly applicable to your job. Completing this Certified Course will validate your expertise and demonstrate your commitment to ongoing professional development in the field of Computer Science. Career opportunities: Upon completion, you will be well-equipped to pursue roles such as DevOps Engineer, CI/CD Specialist, Automation Engineer, or Software Developer. This certification will enhance your employability and position you as a valuable asset in organizations seeking modern, efficient software development practices. Get started today and take a significant step toward advancing your career with our Certified Course in Jenkins CI/CD with Git and GitHub. Invest in your professional growth and stay ahead in the evolving world of technology. SDET QA

Computer Science Category's Courses

Course Lesson(5)

Lesson 1 : **Continuous Integration with Maven Jenkins Git GitHub part 1**

Lesson 2 : **Continuous Integration with Maven Jenkins Git GitHub part 2**

Lesson 3 :
How to work with Git Github using Eclipse Commit Push Branching Pull Request Merging

Lesson 4 :
Part1 SDET Essentials Jenkins Build Delivery Pipeline CI CD How to create Jenkins Pipeline

Lesson 5 :
Part2 SDET Essentials CI CD How to Build Pipelines with Groovy Script Scripted Declarative
