About the course Postman API testing step by step

Course Presenter : SDET QA

Enhance your professional skills and accelerate your career growth with our comprehensive online course, Postman API Testing Step by Step. Designed for learners seeking to master API testing within the field of Computer Science, this training course provides practical, hands-on experience to help you confidently evaluate and optimize application performance. Whether you are a beginner or an experienced developer, this certified course offers valuable insights into API testing best practices, making you a sought-after professional in the Middle East and beyond. Throughout this course, you will learn how to effectively use Postman for API development, testing, and automation. You will gain skills in creating test scripts, analyzing API responses, troubleshooting issues, and integrating testing processes into your development lifecycle. This knowledge is essential for improving the quality and reliability of software applications, ultimately supporting your career growth in the evolving tech landscape. This course is ideal for software developers, QA professionals, technical testers, and IT specialists who want to strengthen their understanding of API testing within Computer Science. It is also suitable for students and professionals aiming to enhance their technical skill set for better job prospects and certification readiness. Why choose this course on our platform? We offer a trusted, industry-relevant training experience that combines theoretical knowledge with practical exercises. Our courses are designed by industry experts and provide a certification upon completion, validating your skills and boosting your professional profile. With flexible online learning options, you can learn at your own pace while gaining the skills needed to excel in the competitive tech industry. Career opportunities after completing this certified course include roles such as API Tester, QA Engineer, Software Developer, Automation Engineer, and Technical Analyst. These positions are highly valued across the Middle East, Saudi Arabia, UAE, and globally, offering significant potential for career advancement. Enroll today to receive your official certification and take the next step toward becoming a proficient API testing professional. Our training course equips you with essential computer science skills that are crucial for todayâ€™s tech-driven job market. SDET QA

Computer Science Category's Courses

Course Lesson(7)

Lesson 1 :
Postman Beginners Crash Course Part 1 API Testing Introduction Postman GUI HTTP Requests

Lesson 2 : **Postman Beginners Crash Course Part 2 API Testing HTTP Requests Validations**

Lesson 3 : **Postman Beginners Crash Course Part 3 API Testing Data Driven Testing HTML Reports**

Lesson 4 :
Postman Beginners Crash Course Part 4 API Testing Fake API Creation Postman variables

Lesson 5 : **Postman Beginners Crash Course Part 5 API Testing Chain API Requests Authorizations**

Lesson 6 :
Postman Beginners Crash Course Part 6 API Testing Postman Scripting Files Upload Download

Lesson 7 : **Postman Beginners Crash Course Part 7 API Testing Collections Jenkins integration**
